

MYRIAD FORESIGHT® CARRIER SCREEN PARTNER TESTING

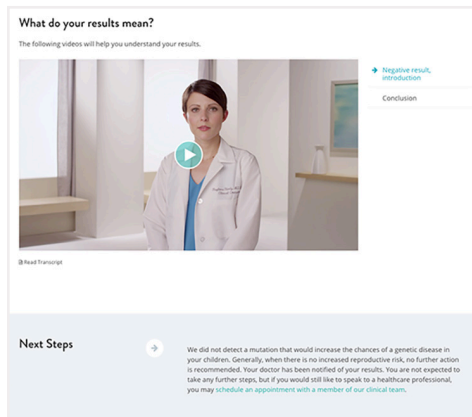

Find out if both you and your partner are carriers of the same inherited health condition that could be passed on to a child.

You'll receive e-mails from Myriad throughout the screening process so you can stay informed.

RECEIVING YOUR RESULTS

The screening process can take two to four weeks, depending on the female result. You can create an online account to track your sample's progress through every step. You'll receive an email notification when Myriad receives your sample.

What do your results mean?

The following videos will help you understand your results.

Next Steps

We did not detect a mutation that would increase the chances of a genetic disease in your children. Generally, when there is no increased reproductive risk, no further action is recommended. Your doctor has been notified of your results. You are not expected to take any further steps, but if you would still like to speak to a healthcare professional, you may schedule an appointment with a member of our clinical team.

YOUR ONLINE ACCOUNT IS ALSO WHERE YOU'LL BE ABLE TO:

- View your results
- Schedule time to talk with a genetic counselor
- Pay your bill (if you owe anything)

Once you receive your final results, you can work with your healthcare provider or a genetic counselor to understand the result and figure out next steps.
